Box N	lo. I Basis of this opinion
1. With	regard to the language, this opinion has been established on the basis of:
	the international application in the language in which it was filed
	a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
	This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a)) regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been slished on the basis of:
a.	type of material
a.	
	a sequence listing
	table(s) related to the sequence listing
b.	format of material
	on paper
	in electronic form
c.	time of filing/furnishing
	contained in the international application as filed.
	filed together with the international application in electronic form.
	furnished subsequently to this Authority for the purposes of search.
4 5. Addi	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished. tional comments:

Form PCT/ISA/237(Box No. I) (April 2007)

International application No. PCT/US05/00885

YES

applicability; citations and explanations supporting such statement				
1. Statement				
Novelty (N)	Claims 13-18, 20	YES		
	Claims <u>1-12, 19</u>	NO		
Inventive step (IS)	Claims NONE	YES		
	Claims 1-20	NO		

2. Citations and explanations:

Industrial applicability (IA)

Claims 1-5, 12 and 19 lack novelty under PCT Article 33(2) as being anticipated by McGarrah, US 6,023,870.

With respect to claims 1, 12, and 19, McGarrah teaches a vending machine 10 having a front display panel and a plurality of statically adhered sheets 12, 72, 73, and 74 removably attached to the display panel.

Claims 1-20

Claims NONE

With respect to claims 2-3 and 9-10, the statically adhered sheets 12, 72-74 can be decorative or functional.

With respect to claim 4, the sheets are attached to a vending machine.

With respect to claims 5 and 10, the sections are statically adhered to the surface of display panel.

Claims 1-3 and 5-12 lack novelty under PCT Article 33(2) as being anticipated by Ages, US 3,513,580.

With respect to claims 1 and 12, Ages teaches a laminated display form for attachment to a watch comprising a sheet 10 having a plurality of separable section 12, wherein each section is removably attached by adhesive to the surface of a watch. The sheet 10 has along the bottom instructional or installation guide for attaching the section to the watch.

With respect to claims 2-3 and 9-10, the sections 12 can be decorative or functional.

With respect to claims 5 and 10, the sections are adhered to the surface of the watch.

With respect to claims 6-8 and 11, Ages teaches an installation guide in the form of written instruction on the bottom of the form 12.

With respect to claim 12, since the vending machine is not positively claimed, display form taught by Ages meets the claimed limitations.

Claims 13-18 and 20 lack an inventive step under PCT Article 33(3) as being obvious over McGarrah, US 6,023,870 in view of Ages, US 3,513,580.

McGarrah teaches a vending machine 10 having a front display panel and a plurality of statically adhered sheets 12, 72, 73, and 74 removably attached to the display panel. McGarrah does not teach installation guide or instructional indicial.

Ages teaches a laminated display form for attachment to a watch comprising a sheet 10 having a plurality of separable section 12, wherein each section is removably attached by adhesive to the surface of a watch. The sheet 10 has along the bottom instructional or installation guide for attaching the section to the watch.

It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the statically adhered sheets taught by McGarrah with instructional indicia or installation guide as taught by Ages to provide a means to instruct a user how the sheets are to be attached to a support surface such as the display surface.

With respect to claims 14-15, the statically adhered sheets 12, 72-74 taught by McGarrah can be decorative or functional. With respect to claim 16, McGarrah teaches a vending machine.

Box No. I Basis of this opinion
1. With regard to the language, this opinion has been established on the basis of:
the international application in the language in which it was filed
a translation of the international application into, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).
2. This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this
Authority under Rule 91 (Rule 43bis.1(a)) 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, this opinion has been
established on the basis of:
a. type of material
a sequence listing
table(s) related to the sequence listing
in the state of the sequence states
b. format of material
on paper
in electronic form
c. time of filing/furnishing
contained in the international application as filed.
filed together with the international application in electronic form.
furnished subsequently to this Authority for the purposes of search.
4. In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed
or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
5. Additional comments:
5. Additional comments.

Industrial applicability (IA)

Claims 1-20

Claims NONE

NO

2. Citations and explanations:

Inventive step (IS)

Claims 1-5, 12 and 19 lack novelty under PCT Article 33(2) as being anticipated by McGarrah, US 6,023,870.

With respect to claims 1, 12, and 19, McGarrah teaches a vending machine 10 having a front display panel and a plurality of statically adhered sheets 12, 72, 73, and 74 removably attached to the display panel.

With respect to claims 2-3 and 9-10, the statically adhered sheets 12, 72-74 can be decorative or functional.

With respect to claim 4, the sheets are attached to a vending machine.

With respect to claims 5 and 10, the sections are statically adhered to the surface of display panel.

Claims 1-3 and 5-12 lack novelty under PCT Article 33(2) as being anticipated by Ages, US 3,513,580.

With respect to claims 1 and 12, Ages teaches a laminated display form for attachment to a watch comprising a sheet 10 having a plurality of separable section 12, wherein each section is removably attached by adhesive to the surface of a watch. The sheet 10 has along the bottom instructional or installation guide for attaching the section to the watch.

With respect to claims 2-3 and 9-10, the sections 12 can be decorative or functional.

With respect to claims 5 and 10, the sections are adhered to the surface of the watch.

With respect to claims 6-8 and 11, Ages teaches an installation guide in the form of written instruction on the bottom of the

With respect to claim 12, since the vending machine is not positively claimed, display form taught by Ages meets the claimed limitations.

Claims 13-18 and 20 lack an inventive step under PCT Article 33(3) as being obvious over McGarrah, US 6,023,870 in view of Ages, US 3,513,580.

McGarrah teaches a vending machine 10 having a front display panel and a plurality of statically adhered sheets 12, 72, 73, and 74 removably attached to the display panel. McGarrah does not teach installation guide or instructional indicial.

Ages teaches a laminated display form for attachment to a watch comprising a sheet 10 having a plurality of separable section 12, wherein each section is removably attached by adhesive to the surface of a watch. The sheet 10 has along the bottom instructional or installation guide for attaching the section to the watch.

It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the statically adhered sheets taught by McGarrah with instructional indicia or installation guide as taught by Ages to provide a means to instruct a user how the sheets are to be attached to a support surface such as the display surface.

With respect to claims 14-15, the statically adhered sheets 12, 72-74 taught by McGarrah can be decorative or functional. With respect to claim 16, McGarrah teaches a vending machine.
